

Assignment 8

Step 6 of Your PDA

Python/Connector (35 points)

For this part you need to download and install [Connector/Python](#). You are to create an application using Python/Connector that makes sense for your PDA. Your application must have multiple SQL commands and user input that allows you to complete a "higher-level" problem. Submit a .pdf file that includes: (1) a description (in English) of what your application does, (2) your Python/SQL code, and (3) output of the execution of your code that demonstrates that it works.

Grading Rubric:

Criteria	Rating	Max Points
Problem requires three or more SQL commands	5 points: Full marks 0 points: No marks	5
English description of what application does	5 points: Clear 0 points: Missing or incoherent	5
Python/SQL code	15 points: Logical and clear code 8 points: Does not clearly solve problem 0 points: No mark	15
Script file demonstrates the code works	10 points: Clearly demonstrates working code and what it does 5 points: Does not fully demonstrate 0 points: Missing or meaningless	10
